

Published nominations to the default CTA panel

Gong 2021 · Supplementary Data 5
Published as protein-coding

Gong 2021 · Supplementary Data 6
Published as noncoding

Bradley 2020 · Figure 3
Cancer-placenta candidates

S6 retains ERVH48-1, now protein-coding. Unmapped and noncoding entries remain in the source audit.
The three lists overlap; their counts are not additive. Bradley validates VGLL1, which fails our HPA restriction gate.
